

**Radiology Report (3598440-15/Radiographs Only - Priority)****Completed 12/23/17 08:08 AM****Patient Name:** Glory Love (7606)

<b>Requesting Doctor:</b> Matthew Bettencourt, DVM	<b>Species:</b> Canine	<b>Age:</b> 0Yr 0Mo
<b>Gender:</b> Female	<b>Breed:</b> Labrador Retriever	<b>Weight:</b> 0.00 Lb

**HISTORY:** Priority

No physical complaints per owner. Elbow evaluation for breeding purposes only.

Flexed lateral projections of the right and left elbow joints are available for interpretation.

**FINDINGS:**

Right elbow: The right elbow joint is within normal limits

Left elbow: The left elbow joint is within normal limits

**CONCLUSIONS:** These flexed lateral projections of the elbow joints are within normal limits**RECOMMENDATIONS:** A definitive indication for additional radiography is not identified. If there is a concern regarding the possibility of elbow disease consider obtaining cranial caudal projections of the elbow joints to further exclude the possibility of osseous abnormalities which might not be appreciated on these flexed lateral images. Ultimately, additional imaging and management of this patient is recommended as directed by the clinical picture.
